Remarks

Claims 1-71 are pending in the present application and are subject to a restriction and election requirement.

Applicant elects without traverse to prosecute Group I consisting of claims 1-64

With regards to the election of species requirement, the Applicant elects a method which utilizes an EL composition that includes a phosphor, an acrylated urethane oligomer, an acrylated monomer, and a photoinitiator. This election reads on claims 1-64.

Applicant also elects a method which utilizes a dielectric composition which includes an acrylated urethane oligomer, an isobornyl acrylate monomer, dielectric material, and a photoinitiator. This election reads on claims 1-64.

Applicant elects a method which utilizes an opaque conductive composition which includes an acrylated urethane oligomer, an acrylated epoxy oligomer, and isobornyl acrylate monomer, a silver powder, silver flakes, and a photoiniator. This election reads on claims 1-64.

Applicant also elects a method which utilizes a transparent conductive composition which includes an acrylated urethane oligomer, and acrylated expoxy oligomer, an isobornyl acrylate monomer, a conductive powder, and a photoinitiator, dielectric material, and photoinitiator. This election reads on claims 1-64.

Finally, the elected method of curing for each layer is by exposure to UV light. This election reads on claims 1-64.

Prompt and favorable consideration of this application is requested. If the Examiner notes any minor errors, he is invited to telephone the undersigned so that the matter can be promptly handled by Examiner's amendment.

Respectfully submitted,

Roy C. Krohn et al.
